

A MESSAGE FROM MICHAEL LANDGUTH

Raleigh-Durham International Airport is embarking on an exciting future. As central North Carolina's primary international airport, we take very seriously our role in serving the aviation needs of our thriving region. That's why we are committed to the vital projects in Vision 2040, our ambitious master plan for the next 25 years.

Vision 2040 includes major infrastructure projects and amenities that will elevate the flying experience. Improvements begin with building a new primary 10,000-foot runway that can be extended to 11,500-feet, new taxiways and up to 23 new gates to accommodate passenger demand. The plan also calls for upgrading parking facilities, a more efficient roadway system in the terminal area, and a new consolidated rental car facility and ground transportation center, which will provide a connection to the region's transit choice.

Why is Vision 2040 so important? Simply, it helps define the future of the airport while ensuring that it continues to meet our region's growing demand and remains a driving economic force in the state of North Carolina. Throughout the process, we have been pleased with the community's interest and involvement in shaping what our airport will look like for the next generation. The more than 1,000 comments we've received since June 2015 demonstrate the varied interests of our community, which are reflected in our proposed plan.

As we work toward sharing our plan with the FAA for approval, we want to continue hearing from the public. Please take time to review our proposed plan and submit your feedback and questions via our website at vision2040.rdu.com.

Thank you for taking the time to attend our Oct. 11 public workshop. We appreciate your interest and participation in our master planning process.

Sincerely,

Michael J. Landguth, A.A.E.
President and CEO

RDU PLAYS A KEY ROLE IN THE REGION'S ECONOMIC GROWTH

Locally owned and operated, RDU is an economic engine that connects the region to the global economy.

\$8.5 BILLION
annual economic impact

10 MILLION
passengers served each year

20,600
jobs supported by RDU operations

MAJOR PROJECTS

Airfield Expansion

Rebuild Runway 5L/23R in a new location, with the ability to extend to 11,500 feet.

- ▶ Includes additional taxiways
- ▶ Allows current runway to be used while new one is built, no disruption in air service

Terminal Development

Expand existing terminals incrementally as demand warrants.

- ▶ Expansion of Terminal 2, including ticketing, bag claim and the Federal Inspection Services Facility
- ▶ Minor expansion of Terminal 1

Ground Transportation Improvements

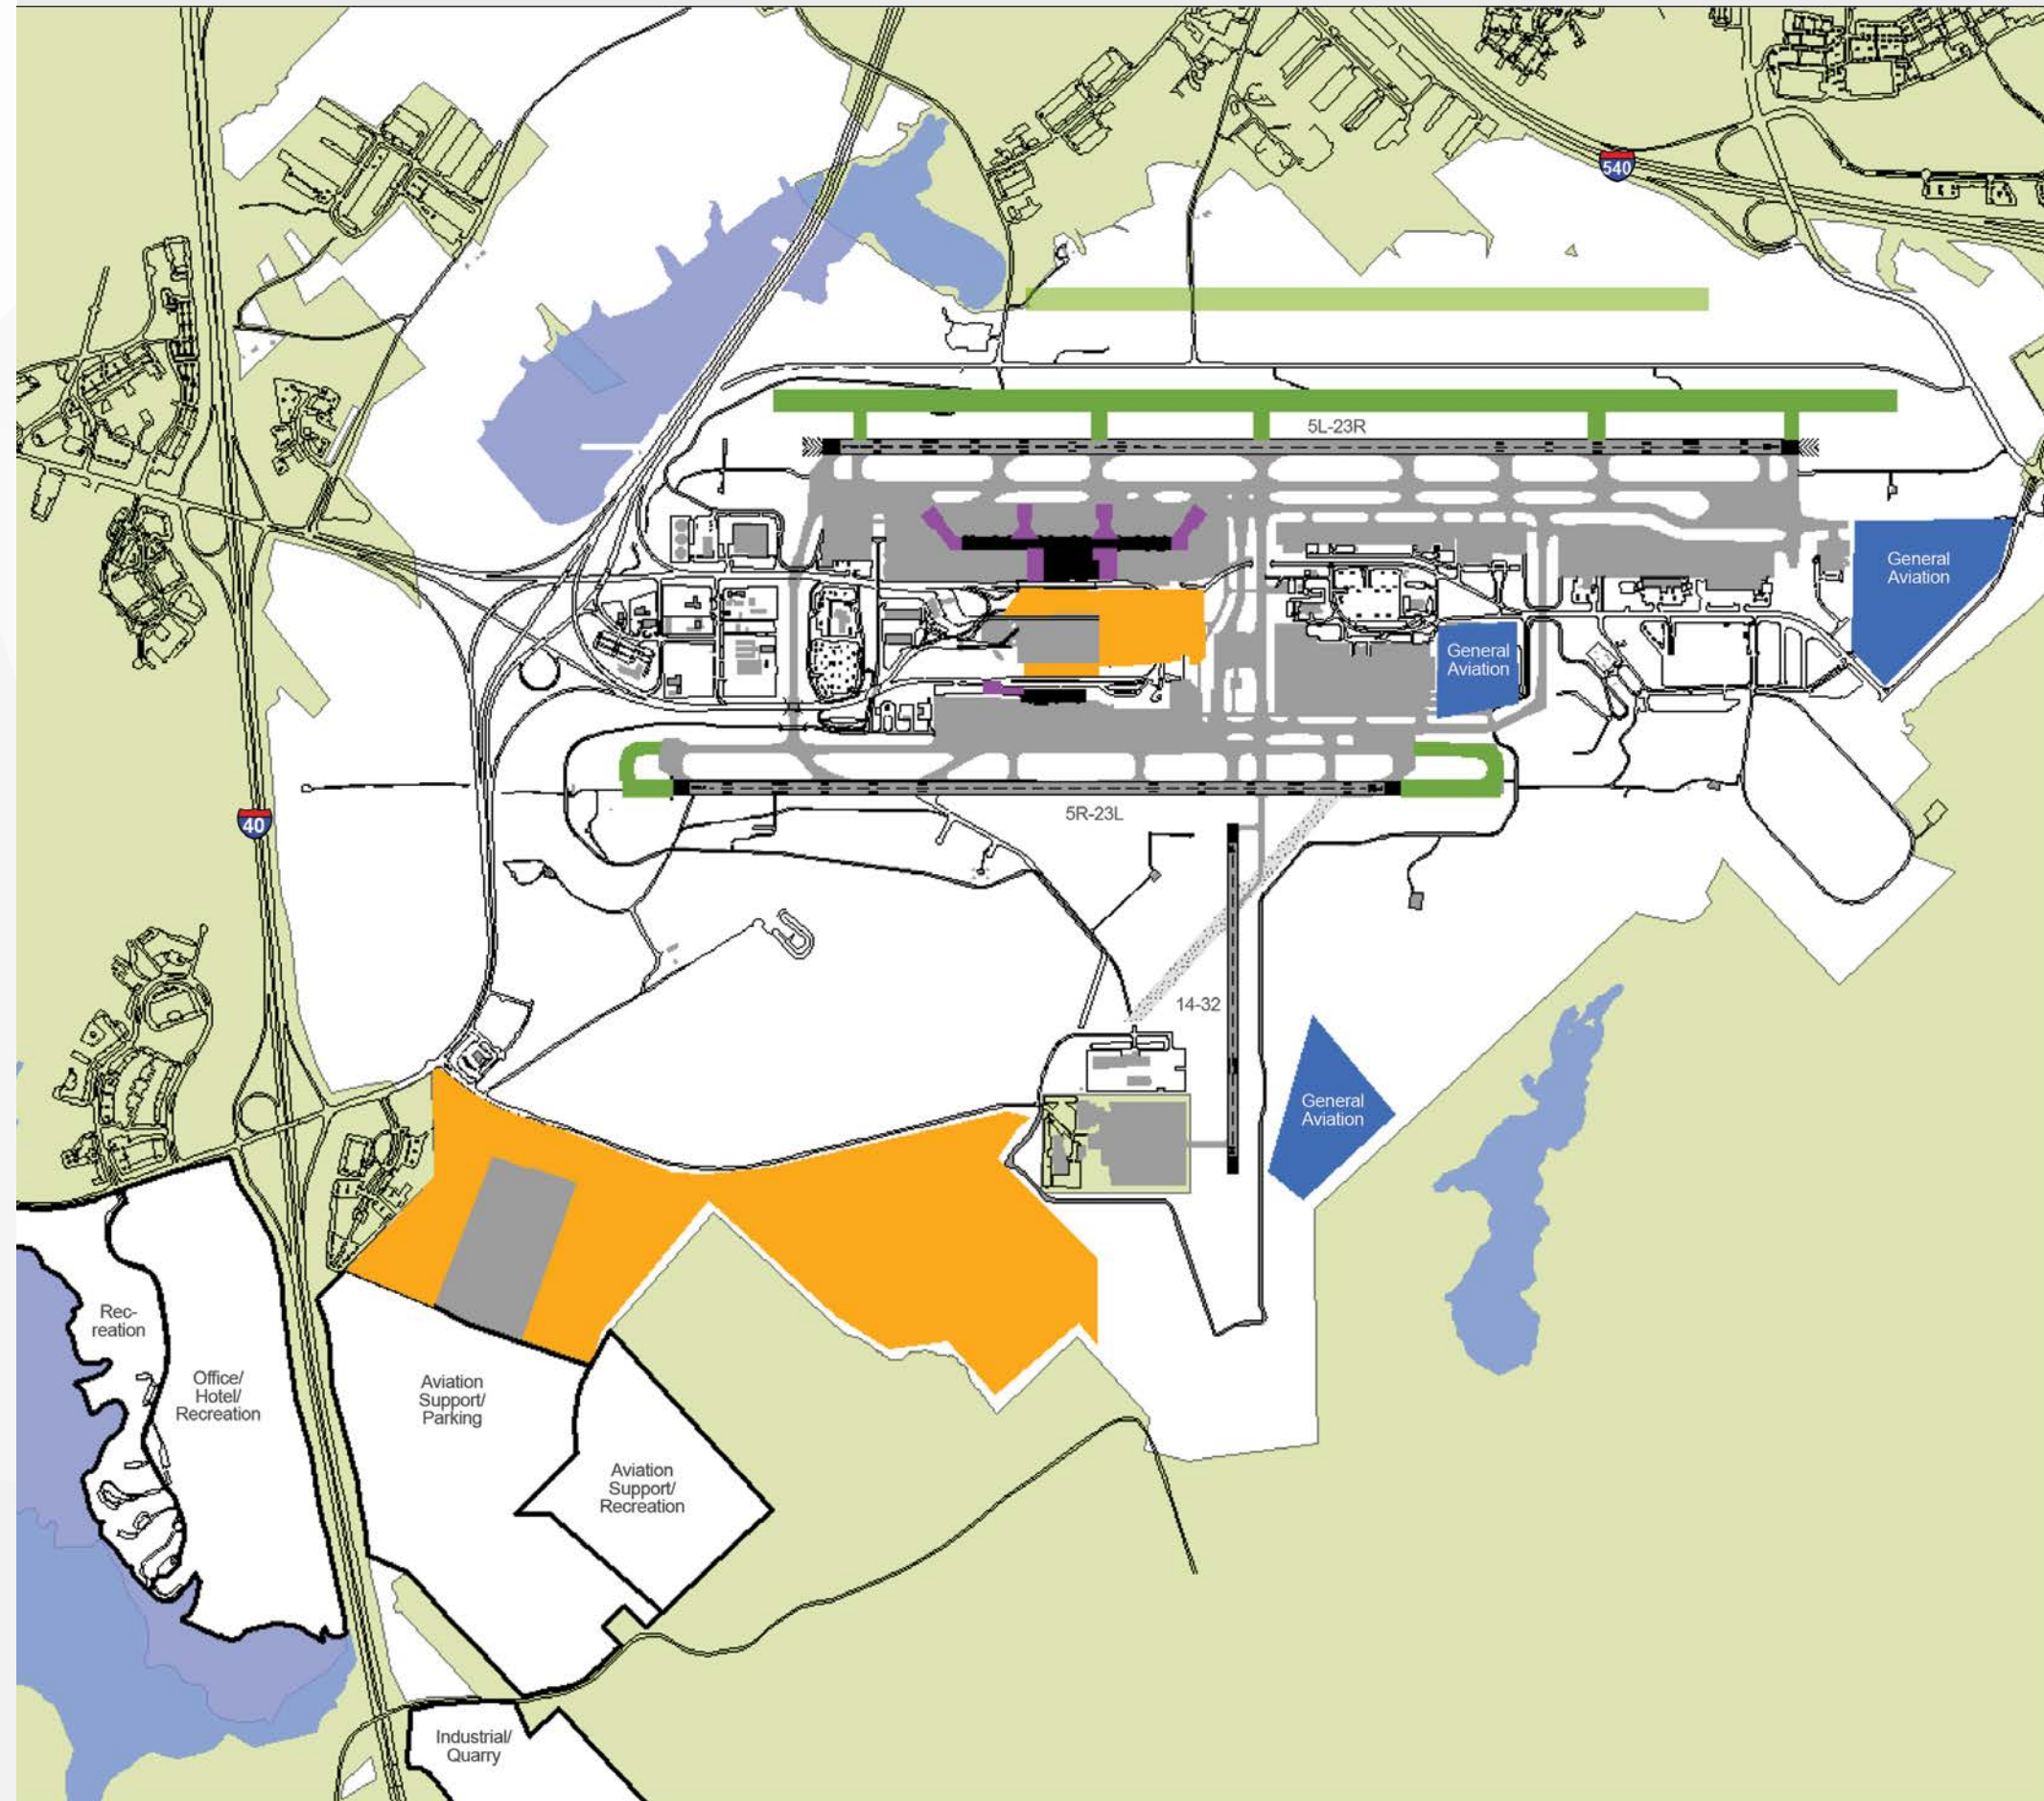

Create new ground transportation facilities, including a rental car facility, transit connection for the region's transit choice, parking and supporting roadway improvements.

- ▶ New Consolidated Rental Car Facility between terminals
- ▶ New Ground Transportation Centers at each terminal
- ▶ Additional parking between terminals
- ▶ Expanded parking along National Guard Drive as demand warrants

General Aviation Development

Support the growth of General Aviation through new facilities and locations.

- ▶ Expanded fixed-based operator space on the current General Aviation site
- ▶ New corporate hanger campus near north end of the airfield
- ▶ Land for a general aviation campus near Runway 14-32 for small aircraft
